TRUCK JACKS

Product Code: BTJ30TA

AIR ACTUATED JACK HIGH LIFT

Safe Working Capacity 30,000kg

The BTJ30TA quickly and easily manages a hefty 30,000kg. This Air Actuated Commercial Jack is designed for heavy duty commercial use and features a long reach "T" handle and large rubber wheels for smooth manoeuvring around the workshop. As always with BORUM, safety is just as important as industrial standard quality, so all BORUM Truck Jacks have a built-in safety valve to prevent overloading and keep the operator safe. With a minimum height of 360mm this jack is ideal for high axle vehicles and a high lift maximum of 772mm (includes additional lifting saddles), this BORUM Air Actuated Jack is a very versatile heavy-lifter suitable for most workshops.

Features

Seals made in America

Double Sealing Function using XTP Industry Sealing

Telescopic air actuation lift (air-hydraulic pump)

Long T-handle easily positions jack under vehicle

Self-Returning Lowering and Lifting Switch

Internal and External Cylinders hard chromed

High manoeuvrability & deep reach under vehicles

Designed for extremely high axles

2 extension adaptors / saddle plates

Large rubber wheels

All adaptors can be properly stored for transport on each side of the jack

**INDUSTRIAL
QUALITY**
